

ENA KOHLI

133 Booth Crescent, Ajax, Ontario, L1Z1K2, Phone: 647-937-7652

Email: ekohli@uwaterloo.ca, LinkedIn: www.linkedin.com/in/enakohli, GitHub: <https://github.com/enakohli>

Summary of Skills

- **Languages:** JavaScript, TypeScript, Java, HTML, CSS, C++, Python, C, Kotlin, NodeJS, SQL, Bash, R, Ruby
- **Libraries/Frameworks:** Django, Ruby on Rails, Functional Programming, Spring, RESTful Services, React, Bootstrap, Angular, Splunk
- **Tools:** JetBrains, Microsoft Office, Eclipse, MS Forms, Power Automate, Git, Figma, Docker, Postman
- **Interpersonal Skills:** Leadership, Teamwork
- **Topics of Interest:** OOP, AI, ML, Data Science, BI, Cloud Computing, DevOps

Education

University of Waterloo (Waterloo, ON)

* September 2019 – June 2024

- Recipient of Bachelor of Computer Science
- President's Scholarship of Distinction

Awards and Nominations

- **Schulich Leader** Nominee
- **LORAN Scholarship** Nominee
- **Case Competition Winner** – Fidelity Investments
- **EngHack 2021** Participant
- **TechNova Hackathon 2021** Participant

Work Experience

Software Developer

DoctorCare – Toronto, ON

* May 2024 – Present

- Partnering with a customer-focused team to design and deploy full-stack features, including generating billing reports, integrating consumer-focused data with Salesforce, and provisioning AWS resources such as EC2 instances.
- Developing and optimizing backend systems by creating scalable solutions for dependency management, custom configurations, and workflow automation, including designing and implementing an OCR-based solution to parse billing day sheets, streamlining data extraction and improving operational efficiency.
- Implementing new application features using Python (Django framework), Ruby on Rails, and PostgreSQL to enhance functionality and system performance.

Software Engineer

OPENLANE – Carmel, Indiana

* September 2023 – December 2023

- Collaborating with a customer-focused team to deploy full-stack features like sending real-time vehicle auto bid updates to the backend, optimizing and testing functions via AWS Lambda and CloudWatch, and enhancing UI for vehicle watchlist.
- Developing new features for the OPENLANE Marketplace, including the creation of a new vehicle description page, filtering through the watchlist API, and adding in Segment events for customer data collection - utilizing tools such as React JS, TypeScript, StencilJS, Postgres, ADO, and JEST

Software Developer

Wonolo Inc. – San Francisco, California

* May 2023 – August 2023

- Delivering client-centric full-stack features in an agile working environment, such as integrating a no code platform, deprecating a column directly impacting customers, introducing W2 and 1099 jobs in the customer portal, and providing the capability for deductions and garnishments to be automatically applied to worker pending checks during a payroll cycle etc.
- Collaborating on several features on the Customer and Admin portals, directly impacting customers, utilizing tools like React JS, React Native, JS, GraphQL, Ruby on Rails, Postgres, JEST, and Zeal API on the Tech Demand team.

Software Engineer

View The Space (VTS) – New York City, New York

* September 2022 – December 2022

- Implementing full-stack features directly impacting clients for the VTS Activate app utilizing tools like React JS, React Native, TypeScript, NodeJS, GraphQL, Postgres, JEST, and CircleCI on the Consumer Experience team.
- Working on several new features, such as adding a dynamic buffer time to events, or booking child and parent related spaces through the VTS Activate app, that is widely used by organizations like Shopify, Brookfield, Studio, Grupo Patio, and more.

Software Developer

Ontario Digital Service (Government of Ontario) – Toronto, ON

* January 2022 – April 2022

- Learning about full stack development and utilizing tools like React, JavaScript, HTML, and CSS to implement projects on Ontario.ca such as showing new business owners how to start creating a business in Ontario.

Projects

“MediTrack” – Android App using Kotlin/Java

* May 2022 – August 2022

- Creating a medical health tracking Android app in a group of 6 developers, that allows users to keep track of medical info including medications, appointments, and insurance providers - incorporating architecture styles and design patterns learned in a university course such as Serverless and Repository Style Architectures, and Adapter and Template Design Patterns
